3.2. Solution-2	
3.2.1. Problem description and its Solution	
3.2.2. Sample code	
3.2.3. Sample Screenshot	
3.3. Solution-3	
3.3.1. Problem description and its Solution	
3.3.2. Sample code	
3.3.3. Sample Screenshot	
3.4. Solution-4	
3.4.1. Problem description and its Solution	
3.4.2. Sample code	
3.4.3. Sample Screenshot	

3.5. Solution-5

3.5.1. Problem description and its Solution

3.5.2. Sample code

3.5.3. Sample Screenshot

4. Recent Technology

4.1. Technology-1

4.1.1. Importance of the technology

4.1.2. Sample code

4.1.3. Sample Screenshot

4.2. Technology-2

4.2.1. Importance of the technology

4.2.2. Sample code

4.2.3. Sample Screenshot

4.3. Technology-3

4.3.1. Importance of the technology

4.3.2. Sample code

4.3.3. Sample Screenshot

4.4. Technology-4

4.4.1. Importance of the technology

4.4.2. Sample code

4.4.3. Sample Screenshot

5. Screenshots

Selected frontend design - excluding recent technology and existing problem solution screenshots.

6. Conclusion

Compress your complete project code and installation guidelines for recent technologies(Software) as a single zip/rar file and upload in the below link. File name should be your Reg_No_Slot (Ex: 17BCE0001_L15_L16.zip)

Introduction

Aim-

The main purpose to make this type of website is to promote students give more and more examination in order to the prepared for their real exam. This website gives the pressure of exam so that they can handle the real exam. It contains different varieties of question on different types of subjects. It helps students to expand their knowledge in different subjects. The level of question depends on the choice of students.

Objective:

This website contains two parts

Teachers and students

Teachers are people who will post question on the website and these question will be used to conduct the examination. Teachers with different question will mark the difficult level and according to those the papers will be set.

Students:

These are the people who will answer the question and they will get the score according to that. The difficulties level will be set by the students according to the level of their own. The students will have ranks according to their scores.

Software used:

VS code:

Xampp:

Mongo dB:

Phpmyadmin:

Tomcat:

Solution for Existing problem

These days students want to cheat in exam by opening multiple tab of their own login. These way their another friend gives their exam. So this way if the student have opened its own account so it can not open another account at the same time existing account has been opened. Now if hew want to open the account then he must have to logout the account. This ensures the transparency during exam.

Conclusion:

The project is good but needs many changes I have learned a lot.
